Activated Shop Modules Overview Settings

**euroblaze** **Sofortüberweisung v1.4**

This module includes the Sofortüberweisung payment method which can be used during checkout process. Once the module is activated the settings will be visible under eShop Admin > euroblaze > ebox Sofortüberweisung. This Module will work only for the Sofort Gateway Projects.

To create a Sofort Gateway project follow below steps:

1. Register with Sofort Payment Gateway at <https://www.sofort.com/register>
2. Once logged in Go to New projects under Projects on left side.
3. Select Sofort Gateway and follow the rest of the steps.
4. If you have an account with Sofort Payment Gateway then you can choose option 1. Else select option 3.
5. Once the project is created successfully go to My Projects under Projects on left side.
6. Select your Sofort Gateway project. Copy the "Configuration key for your shop system" value.
7. The above config key has to be included under eShop Admin > euroblaze > ebox Sofortüberweisung > Overview > Settings.

Activate

fig.1: Sofort v1.4 module details under eShop Admin > Modules

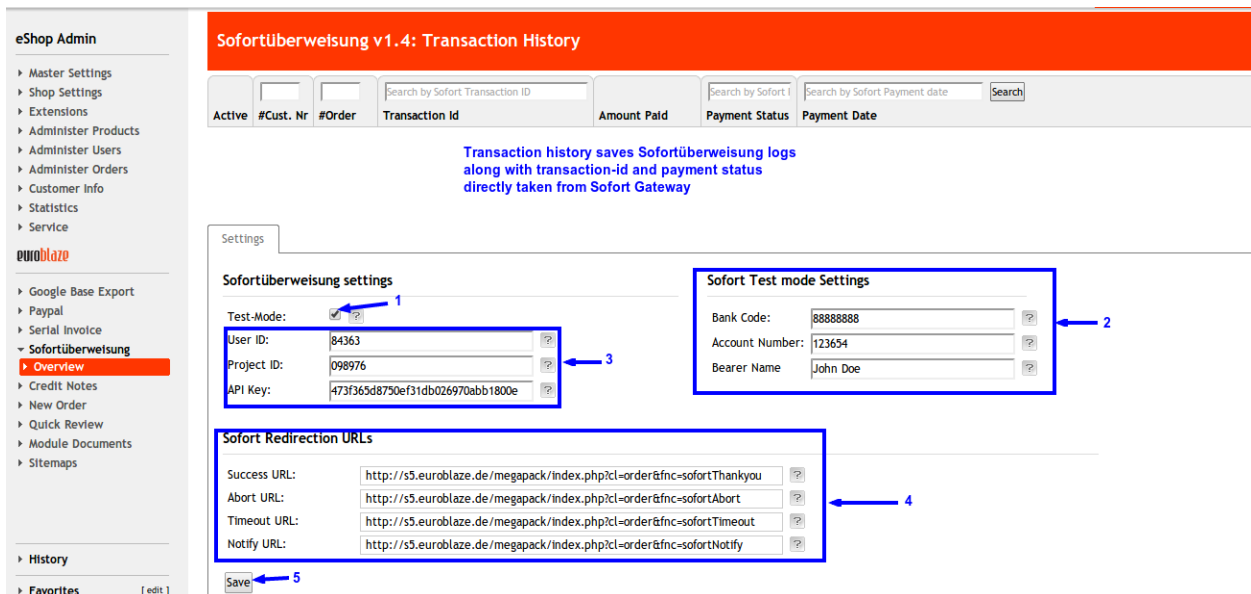

4. Once the module is activated the Overview can be seen under `eShop Admin > euroblaze > Sofortüberweisung > Overview`.
5. Below are the sections present under `Sofortüberweisung > Overview` section:
  - a. Sofortüberweisung Settings
  - b. Sofort Test mode settings
  - c. Sofort redirection URLs.

## Working/Usage

### Step - 1: Configuring Sofortüberweisung settings.

Go to *eShop Admin > euroblaze > Sofortüberweisung > Overview*. Follow these steps:

1. Test-mode option allows using of Sofort test-account. Test-mode should be enabled at both merchant side and also in *Sofort Gateway Account*.
2. For test mode use the settings shown in the fields. Click on [?] next to fields for more information.
3. If you are using Active account then please uncheck test-mode and give actual account details as shown in figure. Make sure test-mode is disabled in your *Sofort Gateway Account*.
4. Redirection URLs should be used in your *Sofort Gateway Account*. These urls are auto-generated by code. These are required transaction logging and sending order confirmation emails.
5. Click save to save the settings.

**Sofortüberweisung v1.4: Transaction History**

Transaction history saves Sofortüberweisung logs along with transaction-id and payment status directly taken from Sofort Gateway

fig. 2: Configuring Sofortüberweisung settings under Overview section.

**Step - 2: Activating Sofortüberweisung in Payment methods**

Once the module is activated (fig-1) and settings are saved (fig-3) Sofortüberweisung payment method will be displayed as shown in fig-5.

1. Select *Sofortüberweisung* from available *Payment methods*.
2. Click on *Active* option, if *Sofortüberweisung* is not active.
3. Assign *User Groups* as per your choice.

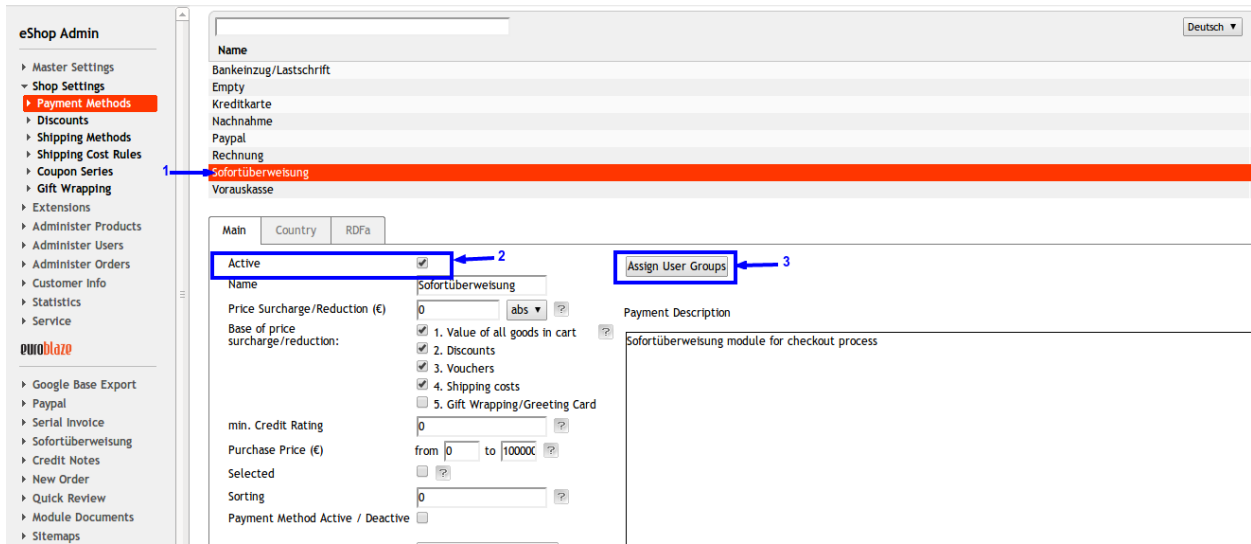

fig.3: Activate Sofortüberweisung payment method at Shop settings > Payment Methods

Once you have configured Sofortüberweisung as per the Steps mentioned in above steps you should be able to see payment methods enabled in your Shop Checkout process. The visibility of the payment method depends upon the settings you made under:

1. Payment methods
2. Shipping methods
3. Shipping Cost Rules

### Step - 3: Configuring Sofortüberweisung Account/Gateway

1. Register your Sofort Account at [Sofort.com](http://Sofort.com).
2. Add a Gateway Project for your Shop at [sofort.com](http://sofort.com) as shown below.
3. Fill in the details as per information provided in each step. For more information visit [Sofort.com](http://Sofort.com)
4. Make sure Test-mode is not active for actual sales.
5. Click on Save to save the settings.
6. On saving you account will generate Configuration Key which can be used in Sofort module settings.
7. The key will have syntax as - 12345:98765:dtbre5zezw4f47ggz78zu. This code can be split as:
  - a. User ID - 12345
  - b. Project ID - 98765
  - c. API Key: dtbre5zezw4f47ggz78zu
8. Above values should be used in Sofort settings explained in [Step-1](#)

## Notes

- Make sure that the Test mode is unchecked when providing Sofortüberweisung Live Account ID. Otherwise all transactions performed will be considered as Test data by Sofortüberweisung (Step-1).
- Make sure that Sofortüberweisung Gateway project is configured at Sofort Merchant account.
- Make sure your site is not password protected by .htaccess.
