Prefix	ebox_
Extends	oxorder,order
Author	euroblaze   Wapsol GmbH - oxid@euroblaze.de
Links	<a href="http://www.euroblaze.de/oxidmodules/">http://www.euroblaze.de/oxidmodules/</a>

## Description

1. ebox\_sofort module is for providing Sofortüberweisung payment for shop customers through Sofortüberweisung payment Gateway.
2. After installing this module in your oxid shop customer have option to choose the the Sofortüberweisung payment type and after that he/she can be redirected to the Sofortüberweisung payment Gateway.

## New Features

The ebox\_sofort module allows you to track the transactions occurred between eShop and Sofort Payment Gateway. The transaction history can be seen under ebox Sofortüberweisung > Overview section. The details are synced with the Sofort Payment Gateway response.

## Installation

1. If there are older files related to Sofortüberweisung module delete them and make sure you delete Sofortüberweisung records from oxpayments table.
2. Copy the `ebox_sofort` folder from the `/copy_this/modules` to your current working copy of modules folder.
3. Activate the module from *eShop Admin* > *Extensions* > *Modules*. Click on the Sofortüberweisung v1.6.
4. Clear temporary files from "/tmp" folder.
5. Give required permissions(777) for log Folder (modules/ebox\_sofort/lib/logs).
6. Make sure that your site is not password protected with .htaccess

## Working/Usage

### Step1 : Activate the module

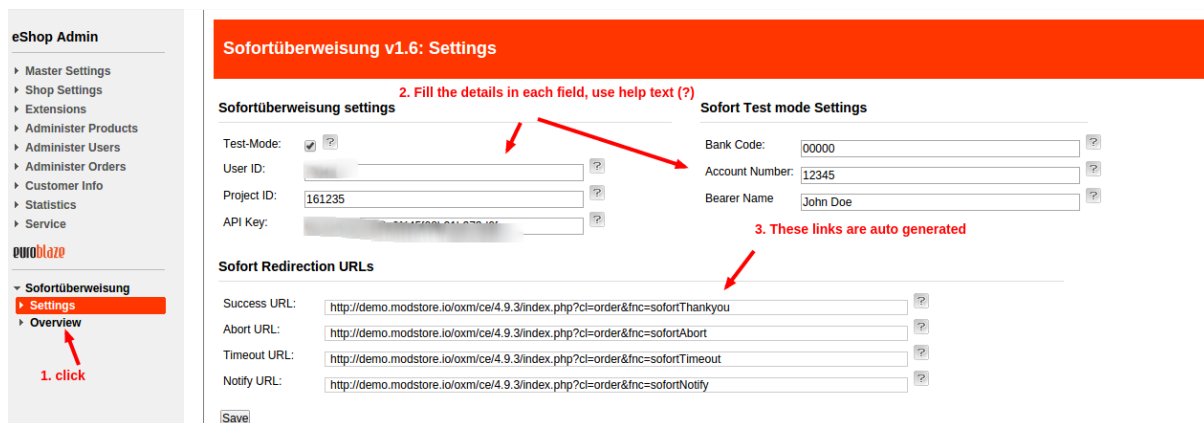

The screenshot shows the eShop Admin interface. On the left, the 'eShop Admin' sidebar has a 'Modules' menu item highlighted with a red arrow and labeled '1. Click'. In the main content area, a table lists installed modules, with 'Sofortüberweisung v1.6' highlighted in red and labeled '2. Select Module'. Below the table, there are tabs for 'Installed Shop Modules', 'Overview', and 'Settings'. The 'Overview' tab is active, showing the 'euroblaze' logo and the text 'Sofortüberweisung v1.6'. An 'Activate' button is visible in the top right corner of the module overview, highlighted with a red arrow and labeled '3. Activate'.

### Module Activation/De-activation

7. The database tables related to Sofortüberweisung module will be automatically installed once you activate the module.
8. After activating the module you can see a Sofortüberweisung payment method assigned to Standard Shipping method and changed this as per your requirement and you can find Sofortüberweisung menu Under Euroblaze Modules.

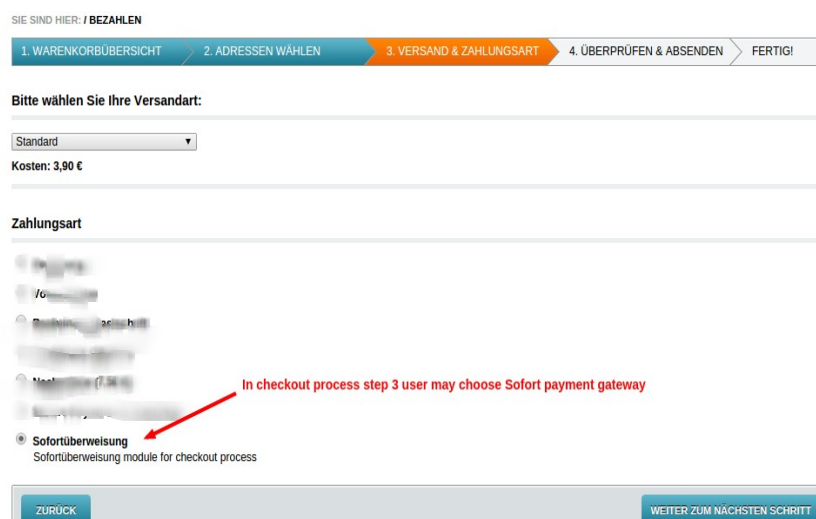

## Step2 : Setting Test or Production Environment

- Setup the required settings in overview tab available in Sofortüberweisung menu. For this go to eShop Admin -> ebox Sofortüberweisung -> Settings and give the settings if your testing please click on Test-mode check box. Settings for the Sofortüberweisung can be obtained once you register with Sofort Payment Gateway. Read the Module Description section in Extensions -> Modules -> ebox Sofortüberweisung or the NOTES section.

### Enter Required Details

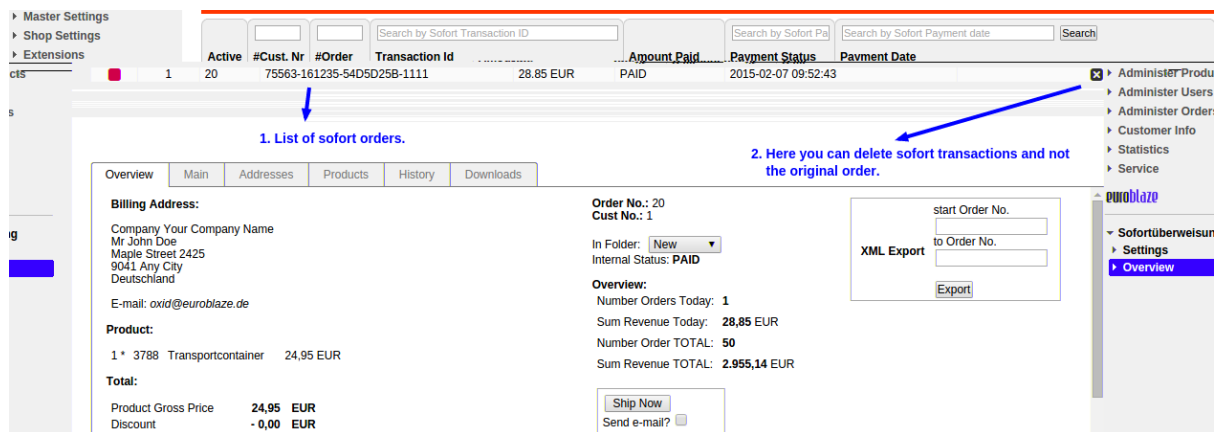

- After Completing all the settings Customer is able to choose Sofortüberweisung option in Payment Step.

### Payment Option in Checkout Step

### Step3 : Saferpay Order Listing & Monitoring problem(s) order

11. Pls check Sofortüberweisung orders at Sofortüberweisung -> Overview for the list of orders made using Sofortüberweisung gateway.
12. If the user is stuck at the middle of the payment at Sofortüberweisung, those incomplete orders are stored in normal orders list with payment status "ERROR".

The screenshot shows the admin interface for the 'Sofortüberweisung' module. At the top, there is a table listing orders with columns for 'Active', '#Cust. Nr', '#Order', 'Transaction Id', 'Amount Paid', 'Payment Status', and 'Payment Date'. A blue arrow points to the first row of this table with the text '1. List of sofort orders.' Below the table, there is a detailed view of an order. On the right side of this view, there is a section for 'XML Export' with fields for 'start Order No.' and 'to Order No.', and an 'Export' button. A blue arrow points to this section with the text '2. Here you can delete sofort transactions and not the original order.'

### List of Sofortüberweisung orders

### Testing / Quality Assurance

This module has been tested with PHPCS for quality purposes for rule-sets:

- codesize
- controversial
- naming
- design

Users wishing to obtain our test-results may email us at [oxid@euroblaze.de](mailto:oxid@euroblaze.de)

We wish you every success with your new module!
